Is your  
**paging system**  
plagued with  
**annoying,**  
ear-piercing  
**feedback**  
**squeal?**

**Digital Stacking  
Feedback  
Eliminator  
is the Solution!**

**V-9964**

Here's how it works:

- **Pick Up the Telephone Handset**
- **Dial Appropriate Access Code**
- **Speak Slowly & Clearly**
- **Hang Up**

Your message is digitized and played back seconds after hanging up! It's that easy!

With Valcom's Digital Feedback Eliminator, paging messages are stored in digital memory and broadcast over the speaker system only after the caller hangs up the phone.

This completely eliminates the possibility of feedback squeal – a quick, easy and cost-effective solution!

Not only that – Valcom's Digital Feedback Eliminator provides feedback elimination to all zones when used with a Valcom multi-zone one-way page control.
