

recordX is the perfect solution for every business.

oak

oak.co.uk

recordX is a comprehensive extension mobile and line side recording solution packed with innovative features to search, record, play and archive calls. Leading edge web technologies ensure that **recordX** is the most powerful yet easiest to use call recording solution available.

call recording **recordX**

● **Resolve Disputes**

Find calls quickly and email an extract of the call to your client to confirm contract details.

● **Demonstrate Compliance**

For many organisations it is necessary to show that FSA rules have been followed.

● **Monitor Quality**

Review calls to ensure that all clients have been dealt with professionally at all times.

● **Improve Performance**

Work with staff to develop their telephone and telesales techniques.

● **Share**

Share conference calls and online meetings with business colleagues.

recordX is designed to enhance your business by enabling you to deliver the best possible service to your customers.

By recording all telephone orders or discussions, you can quickly confirm back to a customer what was agreed. This enables any disputes to be quickly resolved and for the customer to be retained for future business. It also means the avoidance of time-consuming litigation.

recordX also works alongside your staff to help them develop their customer service skills as well as drive new sales through better telesales techniques.

recordX meets the regulatory requirements defined by the FSA and by other regulatory bodies. It is also updated regularly to ensure that it continues to meet the latest regulations as and when they change.

Users can securely access **recordX** both locally and remotely and review recordings that their security policy allows.

recordX works with businesses and call centres of any size, as well as multiple sites, to deliver the maximum benefit at the most cost effective price.

recordX is scalable from 4 to 480 ports per system.

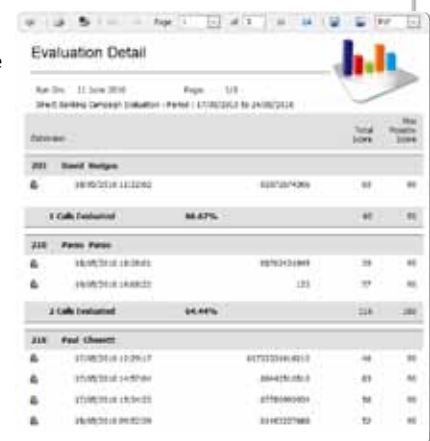

+ Modules

Call Evaluation

This module allows Managers and Supervisors to carry out the objective and automated evaluation of calls.

By scoring calls against manager defined questionnaires, both quality and performance can be measured and used as the basis for both improvements in customer service and for reward schemes.

- Design Custom Questionnaires
- Create Sample Call Sets for Evaluation
- Run Graphical Reports
- Identify Training Needs
- Measure Performance Improvement over Time

Play - Review calls visually within Oak's media style call player.

SDK

The recordX SDK is an optional set of tools and documentation that enables software/database engineers to integrate external systems with the recordX application. Systems integrators can use the recordX SDK to fill a variety of business requirements including PCI compliance. The SDK allows third party software vendors to initiate start/stop commands allowing customers to control which part of the telephone call the recordX system should record thereby ensuring sensitive information is not recorded.

You need the right solution to get the best from your investment in staff and telecoms.

CSX provides the building blocks that will support your business - changing with you and with the times. Use just one of our applications or all of them - or build up your ideal total solution at your own pace.
