

Konftel 50 – a unique solution for natural telephone meetings

Intelligent communications

Now you can meet – in spite of the distance and a pressing schedule. Konftel makes the phone meeting a viable alternative. An opportunity to bring people together, and a chance to hold spontaneous meetings and reach instant decisions. No matter how great the distance. Konftel is the conference phone for the new age, equipped with the unique OmniSound™ – optimal sound with the feeling of togetherness.

Konftel 50 is ideal for the office or smaller meeting room. Simply connect Konftel 50 to your telephone, mobile telephone or PC/Mac. Konftel 50 creates the natural telephone meeting – almost like meeting face to face!

- > For connecting to all types of system telephone
- > Also connects to your GSM or DECT telephone
- > For connection to PC/Mac for IP telephony
- > Can be used in combination with a headset
- > 2 year guarantee

More opportunities!

Konftel 50 is easy to connect and use. Perfect for the office or meeting room as it can be used in many different ways. Konftel 50 has a range of up to approx. 30 m² (300 sq ft). Ideal for up to 6 persons.

Telephone meetings via your system telephone

Konftel 50 is connected to the handset socket on your system telephone. Suitable for all PBXs. The switchbox means that you can change between speaking hands free or into the handset by pressing a button. You can also connect a headset if you prefer.

Telephone meetings via your GSM or DECT telephone

By connecting a special cable (optional) to your Konftel 50 you can hold telephone meetings via your GSM- or DECT telephone. You make the call as normal and use the telephone's functions.

Telephone meetings via your PC/Mac

IP telephony with full duplex! Connect Konftel 50 to the sound input on your PC/Mac using the cables provided. Loudspeaker and microphone volume are controlled on your PC/Mac.

OmniSound™ – the crystal clear sound

Walk around your room quite freely, discussing and debating – with constant high sound quality. No irritating sound clipping, damping or echoes. OmniSound™ produces natural sound in both directions (full duplex) as well as 360° sound pick-up and reproduction. An ultra-sensitive microphone provides omnidirectional sound pick-up and three built-in surround speakers fill the room.
