View, Save and Share -- All in Colour.

This advanced colour Panaboard supports a variety of business situations with a wide range of functions. You can save the information written on the board onto a PC, an SD Memory Card, or USB flash memory, and distribute it as electronic data to your colleagues from a PC, all in colour. Operation is done using easy-to-understand icons. Panaboard gives you maximum power in presentations and conferences.

Easy visual confirmation Easy-to-Read 1.8" Colour LCD

Because it is equipped with a colour LCD that lets you confirm scanned data on the spot, its ecological design makes printouts no longer necessary. And because it displays the operating status with easy-to-follow icons, it is easy for anyone to operate.

Accurate scanning of even blurry text Clear Marker Reproduction Technology

The blurry marker text that was so difficult to scan can now be accurately scanned to produce easy-to-read conference notes.

Flexible installation Thin and Lightweight

This thin, lightweight board is ideal for wall mounting. Rear panel protrusions have been reduced to enable neater, more attractive mounting. The design is a great match for today's modern offices and conference rooms.

Helps prevent data leaks Password Lock for Operation

After turning on the power and setting a four-letter password, data cannot be saved until the password is input.

Operation Password function

By turning on the Screen Erase Announce function, an icon appears on the LCD when scanning is finished as a reminder that the board has not been erased.

Paperless, Data-Based Solutions

Save directly to memory

PC-Free Data Storage Solution

Scanned data can be saved in PDF or JPEG formats on an SD Memory Card or USB flash memory, then transferred to your PC. Now you can easily edit it using the bundled Panasonic Document Management System software.

Save directly to a PC

Direct PC Connectivity Solution

Simply connect the board to a PC with the USB cable to save the board content without having to install any special software. The board imitates USB flash memory, so no additional software is needed to store the scanned images.

Versatile Colour Printing Solutions

Printing without a PC

PC-Free Printing Solution

You don't need a PC to print a copy of the material written on the board. If your printer is equipped with an SD Card slot or USB flash memory slot, you can print data without using a PC. Just plug the storage memory device into the printer and press the Print button.

On-the-spot printing

Direct Colour Printing Solution

The UB-5838C / UB-5338C come standard with a USB printer port. You can connect a printer* directly to the board using a USB printer cable and print data in vivid colour.
