

Konftel 60W Wireless Capabilities

Intelligent communications

So much to do, so little time. Konftel's modern conference telephones are the perfect work tools for those of you who want to meet, despite distances and tight schedules. Quickly gather your colleagues or customers for spontaneous discussions or to relay important information. A safe choice with wireless capabilities. Equipped with Konftel's unique audio technology, OmniSound™.

You and your colleagues can use the Konftel 60W in your daily work. Whether you're in the office, in the conference room or out travelling, it's easy to invite customers or colleagues to a telephone conference.

The Konftel 60W connects wirelessly to most telephones and computers equipped with *Bluetooth*®. Since it connects to mobile phones, you are free to arrange meetings anywhere there is a power outlet. The Konftel 60W is also ready for larger meetings. All you need to do is connect expansion microphones, so that audio pick-up and reproduction are first rate.

- > Requires no separate telephone line or subscription
- > No telephone cables, wireless connection to system telephones, mobile telephones and computers equipped with *Bluetooth*® technology
- > Equipped with OmniSound™ – natural sound in both directions (full duplex)
- > Works with the telephone's functions, such as three-party conferences
- > Prepared for expansion microphones

 **Bluetooth®**

Work flexibly and wirelessly

The Konftel 60W allows more people to work flexibly. With the aid of superb sound quality and easy-to-use functions, the Konftel 60W transforms computers, mobile phones and system telephones into unparalleled conference telephones. A mobile work tool for the modern office.

For rapid and clear decisions

Important decisions are often the fruits borne of many hours of discussion. A wirelessly connected Konftel 60W has a coverage range of about 30 m² and can be placed up to 10 metres from the system or mobile telephone. This means that you can move freely around the room and still participate in calls with customers or colleagues in another town or another country. If the meeting room is large, you can increase coverage by equipping your Konftel 60W with expansion microphones.

For good contact in front of your computer

Receive and provide essential information, enter details into your computer and discuss with your colleague on the phone – all at the

same time. In order to do a good job, you need free hands and perfect audio reproduction. Connect the Konftel 60W to your computer and you are on your way!

Easy-to-use finesses

The fact is that you can handle meetings from your mobile or choose to keep it in your pocket and control the functions via the Konftel 60W. You can transfer three-party calls to the Konftel 60W, for example, which is practical when you want to involve more people in the conversation. Even if the Konftel 60W is connected to a system telephone via a cable (and switchbox), you can still use a mobile telephone equipped with *Bluetooth*®. The point is that you gain a flexible unit that works together with your telephones. Comfort with no hassle.

HERE'S HOW IT WORKS

The Konftel 60W connects via *Bluetooth*® wireless technology through so-called pairing. This means that up to eight mobile or system telephones can be programmed into a memory unit in the Konftel 60W. This procedure, which takes a few seconds, is confirmed in the mobile or system telephone's display. There are also a number of useful function on the Konftel 60W's keypad, such as call holding (if you need to make another call or answer an incoming call) and redial (dials the most recently dialled number).
